Schaumburg Park District ParkFun for iPhone, iPad and iPod Touch now available on the App Store

Stay connected with Schaumburg Park District on the go!

Schaumburg Park District's new ParkFun app for iPhone, iPad and iPod Touch is now available on the App Store. This free application, designed and developed by Links Technology Solutions, Inc., connects users with timely information about park locations, field conditions, facilities and fitness opportunities. Links' work is part of a long-term partnership with the District.

"The app is a great way to stay up-to-date with the District," said Tony LaFrener, executive director of Schaumburg Park District. "We couldn't have done it without the technological expertise of Links Technology Solutions."

Users of the ParkFun app have the ability to locate District parks and facilities. Each facility and park has amenities, photos, phone numbers, hours and directions. Location-based mapping is available and the user's mapping application is used for directions. The app also allows users to contact District facilities by phone or email, view field, ice rink and pool conditions, and configure personal pop-up notifications for conditions. Offline users also have the ability to email and call the District.

Upcoming features of the ParkFun app include news and events, quick links to parkfun.com, a sports leagues section and additional notification settings.

Search ParkFun on the App Store or visit www.parkfun.com/app.

For more information, call (847) 985-2115 or visit www.parkfun.com.

Schaumburg Park District's app now available

Submitted by Schaumburg Park District

Schaumburg Park District's new ParkFun app for iPhone, iPad and iPod Touch is now available on the App Store.

This free application, designed and developed by Links Technology Solutions Inc., gives users timely information about park locations, field conditions, facilities and fitness opportunities.

Links' work is part of a

long-term partnership with the district.

"The app is a great way to stay up-to-date with the district," said Tony LaFrenere, executive director of Schaumburg Park District. "We couldn't have done it without the technological expertise of Links Technology Solutions."

Users of the ParkFun app have the ability to locate district parks and facilities.

Each facility and park has amenities, photos, phone numbers, hours and directions. Location-based mapping is available and the user's mapping application is used for directions.

The app also allows users to contact district facilities by phone or email, view field, ice rink and pool conditions, and configure personal pop-up notifications for conditions. Offline users also have

the ability to email and call the district.

Upcoming features of the ParkFun app include news and events, quick links to parkfun.com, sports leagues sections and additional notification settings.

Search ParkFun on the App Store or visit www.parkfun.com/app.
